

**We ask all candidates, elected officials and citizens to endorse this Declaration of Civil Dialogue and Common Understanding.**

As an organization centered around advocacy for non-violent solutions to conflict, the Peace Alliance understands the critical part dialogue plays in moving the vital agendas of our country forward.

In these critical times, individually and as a nation, we must move our conversations forward in a positive and fruitful way, understanding that we may not all agree at all times. However, we can learn from each other's insights and identify shared priorities. This new understanding moves us toward identifying those principles and programs that are in alignment and can direct us forward toward a more positive future.
